BlueSpace® and Sterling Computers Partner on Cross Domain Messaging Solutions

Leading Systems Integration Expert for Defense and Intelligence Partners with BlueSpace

Austin, TX, September 7, 2007 – BlueSpace Software Corporation, a leader in trusted messaging systems, announced that the Company has entered into a partnership agreement with Sterling Computers to jointly market, sell and implement Cross Domain Messaging solutions for the Defense and Intelligence Community.

Sterling Computers is a Sun Microsystems Partner Advantage Partner. They are a Systems Integration firm and Sun reseller specializing in secure cross domain systems for defense and intelligence. Sterling has unique expertise and experience in deploying Solaris 10 with Trusted Extensions and Sun's Sun Ray desktop technology in highly secure configurations to provide cross domain capabilities.

"We see Sterling as our preferred partner for delivering cross domain messaging solutions using TransMail Trusted Edition," said Justin Marston, BlueSpace CEO. "They bring incredible expertise along with all of the procurement vehicles and security clearances required to implement highly sensitive solutions for the Defense and Intelligence Community."

Sterling is a Small, Minority, Woman-owned, 8 (a), HUBZone certified firm based in Norfolk, Nebraska. Their services and products are available via GSA, ECS III and Blanket Purchase Agreements. Sterling is authorized to resell BlueSpace products.

"Our customers are extremely interested in the BlueSpace cross domain messaging solution," said Jeff Moore, VP of Business Development at Sterling. "TransMail Trusted Edition is the most comprehensive, out of the box solution we have seen to meet the requirements for a single cross domain messaging inbox while providing complete policy management capabilities."

About BlueSpace

BlueSpace Software is a leading provider of trusted messaging solutions. BlueSpace TransMail is a messaging system that was built from the ground up to be "secure by design". Unlike traditional email systems which copy messages constantly, messages within emails have only one instance in TransMail. In addition, metadata is maintained

with this instance and is used within customer defined rules to define access control, communication and retention policies. This design enables TransMail to be core to secure messaging solutions in defense, intelligence, government, health care and financial services. BlueSpace is privately held and is headquartered in Austin, Texas.

About Sterling Computers

Sterling Computers is a Small, Minority, Woman-owned, 8 (a), HUBZone certified firm based in Norfolk, Nebraska with offices in Omaha, NE, Washington DC, Iowa, and California. Sterling provides Network-Centric Communications and Infrastructure support for Defense, Space, Intelligence and Homeland Security. Sterling Engineers and Subject Matter Experts plan, integrate and support network-centric technology into Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) systems, weapons systems, space systems and homeland defense-related systems.
