Brian Vetter Joins BlueSpace® as Chief Technology Officer

Industry Software Veteran Brings Two Decades of Experience Building Innovative, Successful, Market Leading Software Products and Solutions

Austin, TX, September 24, 2007 – BlueSpace Software Corporation, a leader in trusted messaging systems, announced that Brian Vetter joined the executive management team of the company as Chief Technology Officer. Vetter is well known within the Austin software community and within the overall software industry both for his technical skills and business savvy.

Prior to BlueSpace, Vetter was a founder and the CTO of Motive Communications, a highly successful Austin based company that pioneered key segments of the eSupport marketplace. Prior to Motive, he was an early employee and architect at Tivoli Systems which led the creation of the System Management marketplace for client server systems. Tivoli completed a highly successful public offering before being acquired by IBM. Prior to Tivoli, Vetter was an architect at Tandem Computers and was involved in the design and development of Tandem's high availability, highly secure Unix systems.

"Adding Brian to our executive management team says a lot about what we have accomplished at BlueSpace," said Justin Marston, CEO. "Brian will play a key role in taking us to the next level both in terms of our technology and as a business."

"I am excited about joining BlueSpace," said Vetter. "I have been watching the Company for sometime and I believe it will be a leader in the trusted messaging market. My background in security and enterprise systems will enable me to be a big part of the success I believe we will achieve."

Vetter and COO Pat Motola worked together for over 4 years at Motive Communications. "There is no one I would rather have on our team than Brian," said Motola. "Besides just being incredibly talented, his background and experience align exactly with where we are taking the Company."

About BlueSpace

BlueSpace Software is a leading provider of trusted messaging solutions. BlueSpace TransMail is a messaging system that was built from the ground up to be "secure by design". Unlike traditional email systems which copy messages constantly, messages within emails have only one instance in TransMail. In addition, metadata is maintained

with this instance and is used within customer defined rules to define access control, communication and retention policies. This design enables TransMail to be core to secure messaging solutions in defense, intelligence, government, health care and financial services. BlueSpace is privately held and is headquartered in Austin, Texas.
