BlueSpace® CEO Justin Marston Speaking at SABER User Conference

Talk on “Multi-Level Applications” Reinforced By Real Technology From BlueSpace at ISSE/SABER User Conference in Daytona Beach, FL March 22-25, 2010

AUSTIN, TX, March 11, 2010 – BlueSpace Software Corporation, a leader in multi-level security applications, announced that CEO Justin Marston will be speaking at the SABER User Conference in Daytona Beach, FL on March 22-25, 2010. Mr. Marston will discuss his perspective on how MLS technologies are changing, and the importance of MLS application implementation. He will also discuss BlueSpace’s S2 {search and share} application, a multi-level federated search product. In addition, Mr. Marston will display BlueSpace’s multi-level C2 {command and control} application, which will be demonstrated at CWID 2010 as IT Trial 6.42.

To reinforce the talk, Mr. Marston will provide a presentation that showcases the capabilities of BlueSpace Software Corp.

“The SABER PMO is an important partner for us,” says Justin. “They provide several multi-level desktop solutions that are both accredited and proven in the community, which can support our multi-level applications.”

About BlueSpace

“BlueSpace Software is a leading provider of trusted messaging and multi-level solutions. BlueSpace TransMail is a messaging system that was built from the ground up to be “secure by design”. TransMail supports metadata integration into messages via XML, and this data can be used within customer defined rules to define access control, communication and retention policies – enabling attribute-based information sharing, backed up by rigorous audit logs. This design enables TransMail to be core to secure messaging solutions in defence, intelligence, government, health care and financial services. TransMail Trusted Edition is the first commercial off-the-shelf (COTS), multi-level end user application – providing a user with a single inbox for messages across multiple classification levels. Also available, the BlueSpace Trusted Service Bus enables rapid development of multi-level user interfaces for both COTS software applications and custom solutions. BlueSpace is privately held and is headquartered in Austin, Texas.”
